

WHY ON-BOARD SCALES?

Air-Weigh on-board scales take the guesswork out of loading, so you can get the most out of every trip.

- Maximize every payload
- Save time on loading
- Eliminate overweight fines
- Stop paying scale fees
- Maximize service hours

WHAT IS THE DIFFERENCE BETWEEN LOADMAXX AND QUICKLOAD?

- > LoadMaxx has the ability to transmit weights to the tractor's data bus, the LoadMaxx app, and supports an optional printer for in-cab weight receipts.
- > LoadMaxx automatically reads and displays weights of trailers equipped with the LoadMaxx trailer scale via the 7-way cord.
- > QuickLoad is the most economical scale with the same accuracy and durability as LoadMaxx. The scale does not include the advanced communication capability of LoadMaxx.
- > QuickLoad is a good, low-cost choice for straight trucks, dedicated tractor/trailer, and tractor-only applications.

The perfect load
Every time

TRACTOR/TRUCK

- Accurately measures steer and drive axle group weights, Gross Vehicle Weight (GVW), and Net Payload
- Reads and displays weight of LoadMaxx trailers equipped with ComLink
- Supports air ride and most mechanical suspensions
- Bluetooth communication to LoadMaxx App
- Ability to transmit weights to tractor's data bus

TRAILER - STANDALONE

- Available for both air and most mechanical suspensions
- Built-in LED alarm lights
- Dual-point calibration
- High precision pressure sensor for weight accuracy
- Compensation for temperature and altitude change
- PIN protected settings
- English, Spanish, French, and German language options
- ComLink available as a simple plug-and-play option after installation

TRAILER - WITH COMLINK

- All of the same scale features as the Standalone model but allows the trailer scale to communicate weights to any LoadMaxx equipped tractor

STRAIGHT TRUCK

- Available in both LoadMaxx and QuickLoad series
- Supports most mechanical suspensions including: walking beam, trunnion tube, leaf spring, class 5, 6 and 7 suspensions and more
- Lift axle weights available as an option

LOADMAXX APP - A SCALE IN THE PALM OF YOUR HAND

- Pair tractor scale with LoadMaxx App
- Weight log keeps 100 weighing events
- Records date, time, location, and all weights
- Email scale data from the app to any specified email address
- Calibrate your scale from the app

TRACTOR

- Standalone tractor application
- Accurately measures steer and drive axle group weights
- Available exterior alarm lights for overweight protection while outside the cab
- No communication between the tractor and trailer scale

DEDICATED TRACTOR/TRAILER

- Designed for trailers that stay paired with the same tractor
- Measures steer, drive and trailer axle group weights, GVW and Net Payload
- Economical scale with same accuracy and durability as LoadMaxx
- Does not include advanced communication or app capabilities

ALL AIR-WEIGH SCALES COME WITH THESE STANDARD FEATURES

Calibration	Dual-point accurate, PIN protected
Language	English, Spanish, French, & German
Power	Power – 9-32V dc
Warranty	Warranty – 3-year limited

WHICH SCALE IS RIGHT FOR YOU?
