

On-Board Scales

MAXIMIZE PROFITABILITY

- Track weights, pickups and locations
- Access data from any smart device
- Reduce Maintenance Costs
- Optimize Routing
- Reduce Liability

KNOWLEDGE IS POWER

Whether you simply need to know your weights in the cab, or want to integrate with on-board route management software, Air-Weigh on-board scales provide the data you need to run your business efficiently without incurring overweight fines & penalties.

Optimize profitability by knowing container content weight, GVW, net payload and individual group axle weights.

Air-Weigh scales are an investment in safety, vehicle life and profit.

**OPTIMIZE COMMERCIAL
ROUTE PROFITABILITY**

Optimize Route Profitability

Increase your profitability by knowing individual commercial container weight, and identify non-profitable accounts.

- Arm mounted deflection sensors dramatically increase scale durability and reduce calibration frequency
- Measures FEL individual commercial container content weight
- Integration with 3rd party onboard software capabilities
- 3-Year warranty

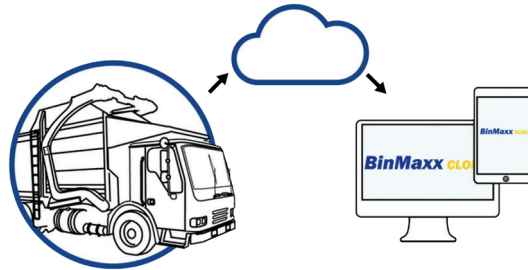

How BinMaxx Works

Weigh-in-motion sensors are mounted on the lift arms that dynamically weigh containers without driver interaction needed.

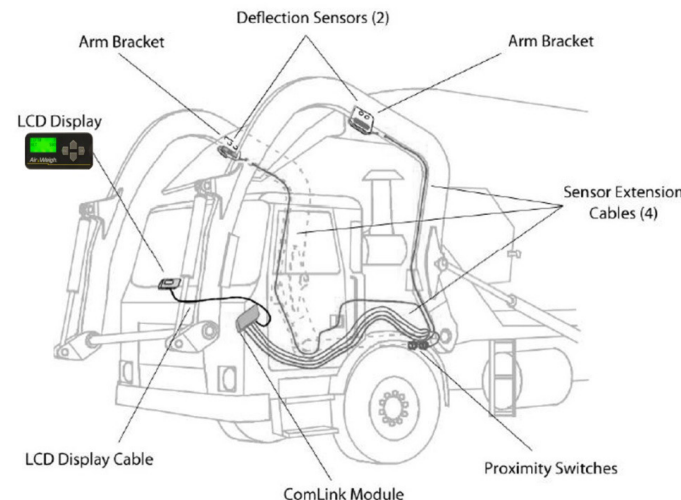

- No requirement to replace OEM forks or fork tubes
- Does not change driver's normal lifting routine
- Arm mounted design optimizes durability and also reduces calibration frequency
- Container content weight is displayed in cab mounted display unit
- Stores up to 1,000 lifts

Cloud-Based Software for Front End Loaders

Add the ability to also transmit lift and weight data from each truck in your fleet to the CLOUD, where the data can then be available on any smart device.

- Secure cloud storage
- No monthly fees or data storage fees
- Access data securely and easily from any computer or smart device
- View and track customer information, pickup location, time and container content weight
- Download detailed lift reports as spreadsheets or PDFs

Need Gross Vehicle Weight?

Know your vehicle's steer, drive, GVW, and Net Payload with a suspension mounted LoadMaxx scale.

- Suspension mounted scale for all refuse vehicle types
- GVW, Net Payload, and Axle Group Weight
- Eliminate overweight fines
- Reduce equipment abuse and related costs
- Two programmable alarm outputs
- 3-Year warranty

LoadMaxx or QuickLoad?

Both the LoadMaxx and QuickLoad scales provide all of the features required to ensure a driver is completing their route safely and legally.

LoadMaxx provides advanced communication features with third party on-board computer integration and Bluetooth to display weights via the FREE LoadMaxx app.

QuickLoad is a great economical choice for those who don't need the additional communication capabilities.
